## Alert in the municipality :

In the event of a major incident, the alert may be given by:

- Siren and/or church bells for bush fire risk
- Mobile loudspeaker message broadcasting (fixed by magnet on a car)
- The Municipality, live messages for instructions : door to door, telephone (SMS) or by emails

## SPECIFIC INSTRUCTIONS

### Evacuation :

- Cut off all networks (gas, electricity, water)
- Leave the accommodation with a bag containing essentials : shoes (no boots in the event of flooding), usual medication, glasses, important papers
- Go to the assembly point defined by the authorities or announced during the evacuation instructions
- In all cases, comply with the instructions received

### Confinement :

- Take shelter in the nearest building
- Close doors and windows, block gaps
- Shut down any ventilation and air conditioning systems
- Plug all the systems with an outside air intake with rags or wet cloths
- In all cases, comply with the instructions received

## PRACTICAL REMINDERS

### Natural disasters

As soon as a disaster occurs, any person has the possibility of asking the Town Hall for recognition of the state of natural disaster and must declare any damages to the insurance within 5 days following the incident.

To be compensated for natural disasters:

- the damaged goods must be covered by a contract insurance
- the state of natural disaster must be recognized by an inter-ministerial decree.

### Information for buyers and tenants

With each sale or rental of real estate, the owner is required to inform the buyer or tenant of his property (built or unbuilt) of certain risks to which this property is exposed. A statement of risks must be formalized.

### Asian hornet nests

The nest of these hornets is spherical in shape with a diameter of 50 to 80 cm and are generally located high up... but not always. Their destruction must imperatively be carried out by professionals using a suitable insecticide and equipped with special full protective clothing.

It is preferable to call on a private pest control company, the engagement of fire fighters must remain exceptional (proven lack of specialised companies or nest too difficult to access)

The cost of this intervention is borne by the owner of the property where the nest is located.

### Heat wave

- ⇒ it's very hot
- ⇒ the temperature does not drop at night
- ⇒ the phenomenon has been going on for several days

### How to react?

- Drink plenty of water (at list 1.5 L a day), wet your skin several times a day
- Do not consume alcohol, eat normally (fruits, vegetables, soup...)
- Do not go out during the hottest hours, do not engage in intense physical activities
- Keep the house cool by closing the shutters
- Contact people around you to see how they are
- For fragile people, spend a few hours in a cool air-conditioned place
- Call **112 or 15** if someone is distressed or ill

## Simplified DICRIM

Document d'Information Communal  
sur les **RI**sques **M**ajeurs  
(Communal Information on **Major Risks**)

\*\*\*\*

### Mayor's message

*Dear Residents,*

*The safety of the inhabitants of OMS is one of the concerns of the municipal team.*

*This document is intended to inform you about the safety instructions to be adopted to deal with any major risks identified in our municipality.*

*Some practical information is also provided. I ask you to carefully review this flyer and keep it safe.*

*In addition to this information, we are developing a Communal Safeguard Plan (PCS) with the objective of organising the town's resources to manage the risks identified.*

*The Town Hall has a document with information about identified risks at your disposal.*

*I hope we never have to apply these safety precaution measures and wish you a good read.*

*The Mayor  
Patrick GERICAULT*

# Good reflexes when facing major risks

## Major risks : Phenomenon characterised by its low frequency and its enormous gravity.

In case of a natural or technological disaster, as soon as the citizen has been notified, he/she must respect the following general instructions :

DANS TOUS LES CAS	BEFORE	DURING	AFTER
Prepare : - a pair of glasses (if necessary) - a torch (batteries to be checked) - a supply of drinking water - during a pre-alert for a possible evacuation, a bag containing first necessity items (urgent medication, identity and important documents, warm cloths, a little money) - Inquire at the Town Hall about the safeguard measures provided by the Communal Safeguard Plan	- Immediately comply with the instructions received: evacuate or confine depending on the nature of the risk (see instructions in the following section)  <div style="display: flex; justify-content: space-around;"> <div data-bbox="571 319 784 531"> <p><b>Listen to the radio</b> France-Bleu Roussillon101.6</p>  <p>For information on the evolution of the situation</p> </div> <div data-bbox="784 319 1019 531"> <p><b>Do not go and pick up children from school</b></p>  <p>Children are cared for by their teachers</p> </div> <div data-bbox="1019 319 1227 531"> <p><b>Do not call</b></p>  <p>Except in case of vital necessity To free up lines for emergency services</p> </div> </div>	- listen to the radio - assess the damages and move away from dangerous areas - make yourself available to emergency services	

The Townhall currently has a directory of citizens' email addresses.  
 Vulnerable and isolated people are also identified.  
 Do not hesitate to contact the reception to give your contact details.  
**National / European emergency number: 112**  
 114 : (SMS or fax only) for people with hearing or speaking difficulties.

 <p><b>Bushfires</b></p> <p><b>BEFORE :</b> Clear bush, maintain the surroundings of dwellings: Comply with the recommendations available on the prevention-66 website  <b>DURING :</b> Comply with the instructions given by the authorities: evacuation or confinement  <b>If evacuation:</b> Move away with your back to the wind, breath through a damp cloth. Go to the designated meeting area: Recreation room under the Town Hall (unless otherwise notified).</p> <p><b>If confined :</b> if possible, spray shutters, doors, and windows with water. Stop ventilation. block gaps and seal the vents. Turn off the gas supply. Take refuge in the most appropriate room, remembering to take a torch, your phone, some water and if possible, a radio. Wait for help and/or new instructions.</p>	 <p><b>Snowfall</b></p> <ul style="list-style-type: none"> <li>- Find out about road conditions</li> <li>- Limit travel; stay at home as much as possible</li> <li>- Protect the pipes against freezing</li> <li>- Do not touch electrical wires that have fallen to the ground</li> </ul>	 <p><b>Storms – Strong winds</b></p> <ul style="list-style-type: none"> <li>- Limit travel: as much as possible, stay at home</li> <li>- Do not walk in the forest, do not take shelter under a tree</li> <li>- Do not touch electrical wires that have fallen to the ground</li> <li>- Do not work on a roof</li> <li>- During thunderstorms, do not use electrical appliances and telephones</li> <li>- Respect deviations put in place</li> </ul>
 <p><b>Industrial hazard – Toxic cloud – Transportation of hazardous material</b></p> <ul style="list-style-type: none"> <li>- Comply with the instructions given by the authorities : evacuation or confinement</li> <li>- No smoking, no flame, no sparks</li> <li>- If the toxic cloud spreads, move away in the direction perpendicular to the wind ; if possible, take shelter in the closest building</li> <li>- Close all openings and block gaps and vents</li> <li>- Turn off ventilation and air-conditioning</li> </ul>	 <p><b>Rock falls – Landslide</b></p> <ul style="list-style-type: none"> <li>- Comply with the instructions given by the authorities</li> <li>- Respect the deviations put in place</li> <li>- Do not engage with or drive on a dangerous signposted road</li> <li>- If possible, go to a sheltered, undamaged room</li> <li>- Flee laterally ; move away from the point of collapse</li> </ul>	 <p><b>Floods – Excessive runoffs</b></p> <ul style="list-style-type: none"> <li>- Stay safe in non-floodable premises. Take refuge on an elevated point (upper floor, hill, etc.)</li> <li>- Do not go on a flooded road by car or on foot</li> <li>- Respect the deviations put in place (do not engage on fords, bridges)</li> <li>- Close openings - Turn off gas and electricity</li> <li>- Evacuate on the recommendation of local authorities or emergency services</li> </ul>
 <p><b>Earthquake</b></p> <p><b>DURING :</b></p> <ul style="list-style-type: none"> <li>- Stay where you are, take shelter under solid furniture or against a load-bearing wall. Avoid being close to electrical wires, trees, bridges, arches...</li> <li>- Do not light a flame (potential gas leak)</li> </ul> <p><b>AFTER :</b></p> <ul style="list-style-type: none"> <li>- Turn off gas and electricity ; no flame</li> <li>- Evacuate and move away from buildings. Go to an open area. Comply with the instructions given by authorities</li> </ul>
